

Faizan Khan

Brooklyn, NY | (929) 548-2656 | faizan.khan.intern02@gmail.com | linkedin.com/in/faizan-khan234 | github.com/jellyfishing2346

EDUCATION

CUNY Brooklyn College

Brooklyn, NY

B.S. in Computer Science, Minor in Data Science (GPA: 3.8 / 4.0)

Expected December 2027

- **CUNY Tech Prep Graduate:** Completed selective, year-long Data Science track program (June 2026).
- **Relevant Coursework:** Data Structures, Database Systems, Operating Systems, Computer Networks, Machine Learning.
- **CS Club Treasurer:** Redirected most of the food budget to fund the club's first hackathon, winning e-board and student government approval.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C++, SQL, Shell

Frameworks: FastAPI, Node.js, Express, React, Next.js, Tailwind CSS

Data & Messaging: PostgreSQL, Redis, MongoDB, SQLite, Apache Kafka

Cloud & DevOps: Docker, AWS (EC2, S3, Lambda), GCP (Cloud Run), Vercel, GitHub Actions (CI/CD), Linux

AI & Dev Tools: Claude, LLM APIs, prompt engineering, GitHub Copilot, Git, pytest

ML: XGBoost, scikit-learn, PyTorch, TensorFlow, Pandas, SHAP, MLflow, Optuna

EXPERIENCE

InZone Inc.

Remote

Full Stack Software Engineering Intern

Oct 2025 – Dec 2025

- Shipped customer-facing full-stack features end to end, building and testing backend REST services in Node.js and Express on GCP, including authentication and real-time event streaming.
- Integrated API data flows with strict input validation to keep user-facing data correct and secure.
- Containerized dev environments with Docker for reproducible setup and faster onboarding.
- Owned features as the sole intern, presenting at weekly planning meetings and coding with Copilot and Claude.

AutoLake LLC

Remote

Software Engineering Intern

Jul 2025 – Sep 2025

- Diagnosed and fixed 15 performance bugs across backend microservices using profiling and logs.
- Improved API consistency across web apps and supported operations with data collection and compliance checks.

CUNY Brooklyn College

Brooklyn, NY

Research Assistant

Jun 2024 – Present

- Build Python ETL and ML workflows with schema enforcement and validation to extract structured data from 450+ page curriculum documents (e.g., ACM/IEEE CS2023).
- Deploy research services via Docker and GitHub Actions, with monitoring that flags anomalies and memory leaks.

CodePath & CUNY Tech Prep

New York, NY

Tech Fellow (CodePath) & Data Science TA (CUNY Tech Prep)

May 2025 – Present

- Mentored 100+ students across CodePath's web development, AI/ML (PyTorch, LLM integration with Claude), and cybersecurity courses.
- Teach a cohort of 20+ CUNY Tech Prep Data Science students pandas, SQL, data visualization, and core ML.

TECHNICAL PROJECTS

Real-Time Fraud Detection Engine | *Python, FastAPI, Kafka, Redis, PostgreSQL, XGBoost, Docker*

[GitHub](#)

- Built solo in 8 weeks: Kafka streams transactions, Redis caches features, and FastAPI scores each in 2–3ms.
- Trained XGBoost on 284K transactions with SMOTE for a 0.2% fraud rate, reaching 89% recall and 0.98 ROC-AUC at a 0.08% false-positive rate; deployed the API and a reviewer dashboard.

Credit Risk Scoring API | *Python, FastAPI, XGBoost, PostgreSQL, Docker, GCP Cloud Run*

[GitHub](#)

- Engineered 176 features from 307K loan records and tuned XGBoost with Optuna and MLflow to 0.78 ROC-AUC.
- Deployed a containerized FastAPI service to Cloud Run returning a risk score and per-decision SHAP explanations in under 35ms, covered by 41 tests.

Quantitative Trading Framework | *Python, Pandas, SQLite, Plotly Dash*

[GitHub](#)

- Built a modular backtesting platform with cached data pipelines and an interactive dashboard, covered by 53 tests.
